

Assembly Instructions

Table Bases to Table Tops

What you will need for assembly:

Drill driver or
screwdriver

Straight
edge

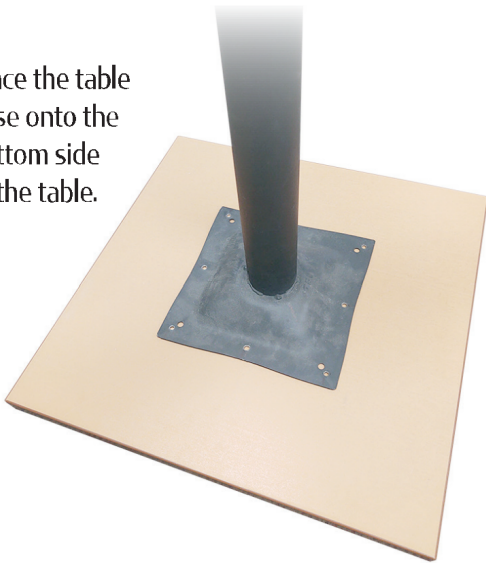

or
Tape
measure

What's in the box:

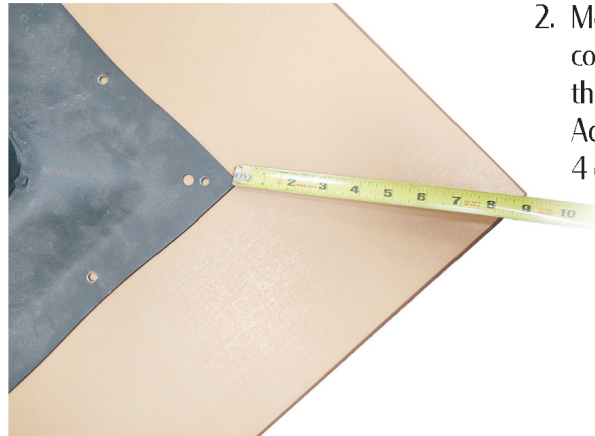

(8) 3/4" #10 screws

1. Place the table base onto the bottom side of the table.

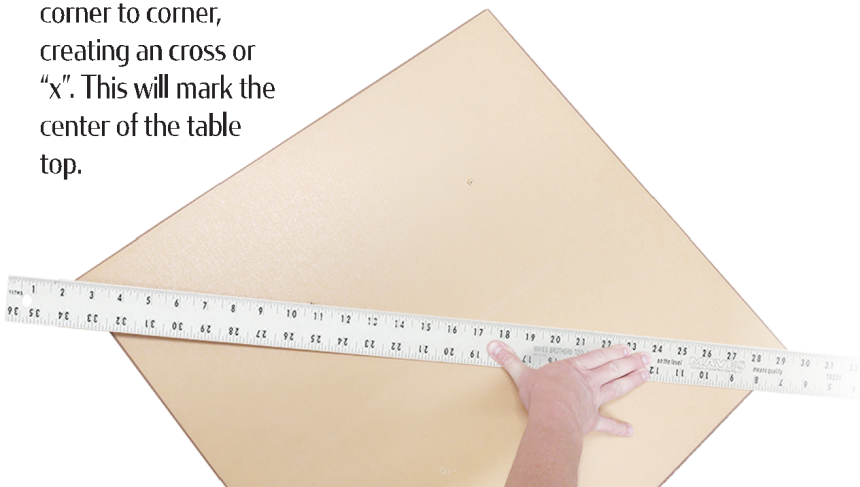

2. Measure from each corner of the spider to the corner of the table. Adjust the base until all 4 corners are equal.

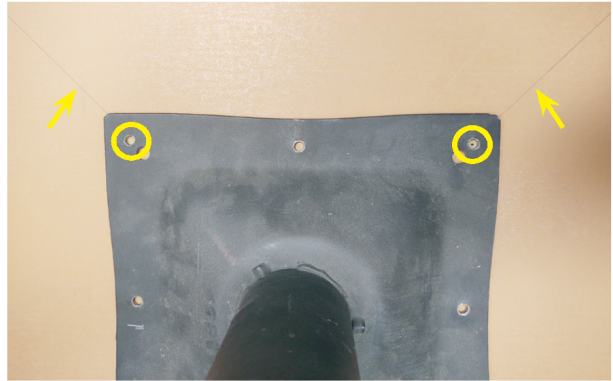

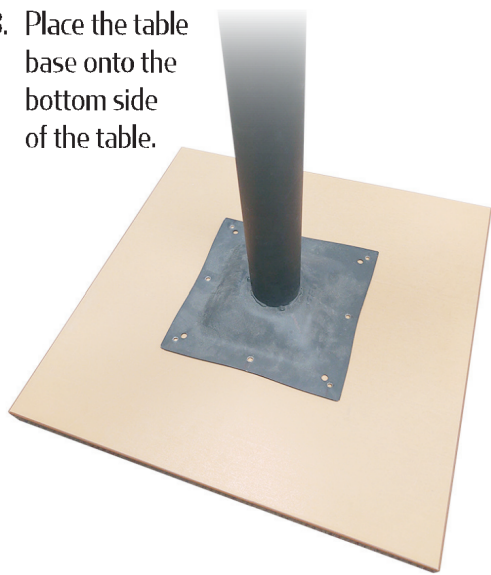

SKIP TO STEP 5

or

1. Take a straight edge and draw a line from corner to corner, creating an cross or "x". This will mark the center of the table top.

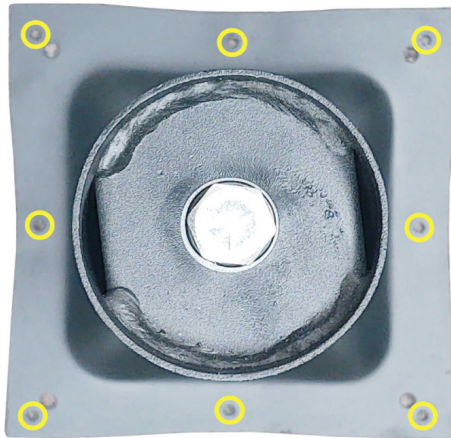

3. Place the table base onto the bottom side of the table.

4. Line up the spider's corner holes with the "x" lines you just drew. This will center the base on the table.

5. Use the 8 perimeter holes on the spider (circled in yellow) to fasten the base to the table top.

6. Using the screwdriver or drill driver and (8) 3/4" #10 screws, fasten the base to the table top.
